Recommended Tools for Installation:			
 Screwdriver	 Hex Key	 pencil	 Drill
 Tape measure (3m-5m)	 Drill bit (ø6.5)	 Sealing Tape	

Instructions for use and maintenance:

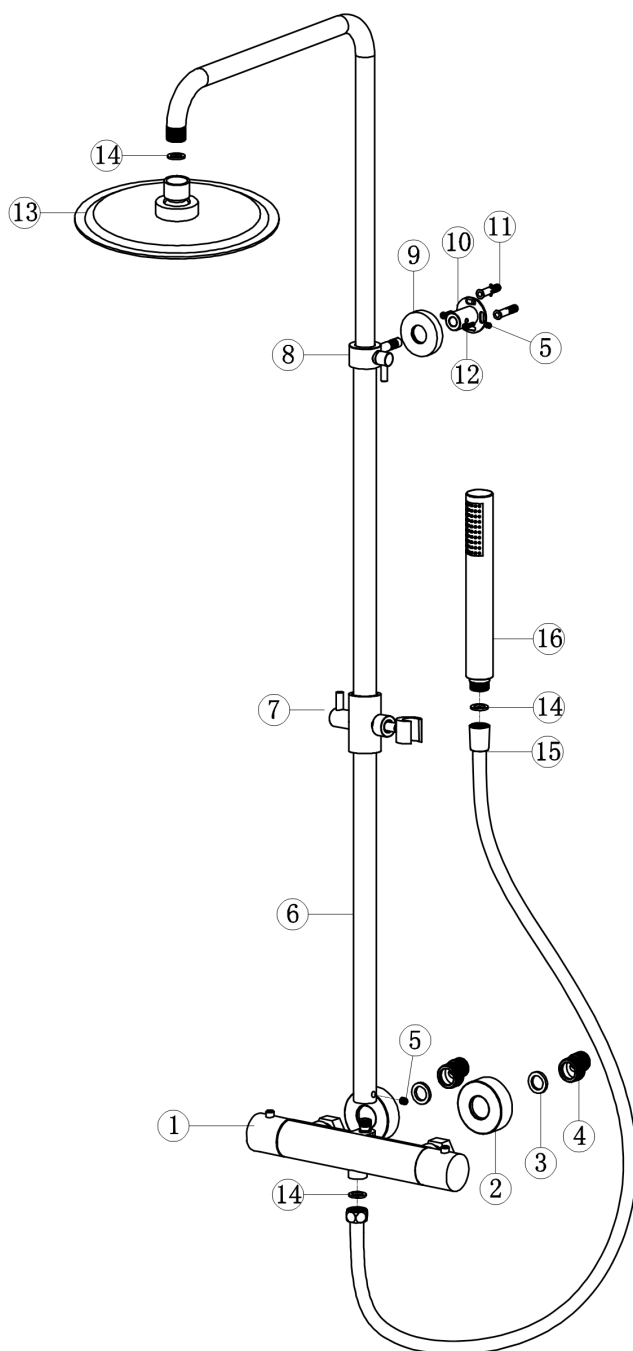

Faucet installation pipe must be hot water on the left and cold water on the right. Then set to the appropriate water temperature when using. (Adjust thermostatic switch to 38 degrees water temperature is appropriate generally, press the key on the handwheel If necessary, turn left at high temperature and turn right at low temperature. Thermostatic switch with limiting position device, and maximum water temperature of the left turn must not be higher than 50 degrees to avoid scalding the body.) Do not force the rotatry switch to avoid damage. Then adjust the gear switch according to the icon.

All parts with filters should be cleaned regularly to avoid water blocked , and affect the normal use of water temperature.
